

We Like Nosey Neighbours

If your neighbour's dog is left outside with no shelter, food, or water . . .

If you see a group of kids kicking a cat . . .

Even if you just suspect an animal may be suffering from abuse or neglect . . .

We want to know

Unlike most crime victims, animals can't seek help themselves. They depend on YOU to stop their suffering. And if you don't call us, who will?

We understand that you respect your neighbours' right to privacy and may not want to see their pet taken away. That's why, after you call us, we'll first try to educate the offender about how to comply with local animal-care laws.

We also realise that when you witness cruelty, you may be afraid to "get involved". That's why we'll keep your report confidential.

All you have to do is pick up your phone and call us. We'll do the rest.
